Testing Manuel Lemos' MIME E-mail composing and sending PHP class: HTML message

Hello Manuel,
This message is just to let you know that the <u>MIME E-mail message composing and sending PHP class</u> is working as expected.

Here is an image embedded in a message as a separate part:

PHP Classes

Thank you,
mlemos

This is an HTML message. Please use an HTML capable mail program to read this message.

All Attachments

You may need to open the PDF reader's attachments list to download or open these files. The same attachment might have originated from multiple mail messages, possibly with different filenames, but only one copy will be attached to this PDF; however, each message will have a seperate annotation pointing to the same attachment.
